

MOHAMED SHIRAS

SOFTWARE ENGINEERING UNDERGRADUATE

Galle, Sri Lanka | mhdshiras.dev@gmail.com | www.mohamedshiras.dev | github.com/MohamedShiras
| linkedin.com/in/mohamedshiras/ | +94775006727

Software Engineering undergraduate at NIBM with hands-on experience building full-stack application across web, mobile and IoT domains. Proficient in Java, Python, Flutter and Javascript with practical exposure to frameworks like Spring Boot. Demonstrated ability to deliver real-world solution- from an auction management system, banking application to an IoT-intergrated smart helmet app - spanning solo projects like hkzmart and team collaborations. Actively expanding skills

EDUCATION

National Institute of Business Management (NIBM) - Galle | Higher National Diploma in Software Engineering | Nov 2025 - Present

- Relevant coursework - Enterprise Application Development, Mobile Application Development, Data Structure & Algorithms, Machine Learning

National Institute of Business Management (NIBM) - Galle | Diploma in Software Engineering | Sep 2023 - Oct 2024

- Relevant coursework - Object-Oriented Programming, Web Development, Database Management System

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, PHP, Dart
- **Frameworks & Libraries:** Flutter, Spring Boot, Bootstrap.
- **Machine Learning:** Jupyter Notebooks, Pandas, Numpy, Computer Vision, Tensor Flow
- **Database:** Firebase, Supabase, MySQL
- **Tools & Cloud:** Git, Github, Postman, VS Code, n8n, Docker, Google Cloud Console

PROJECTS

Serendib - Apartment Management System | Java, Kotlin, Supabase, EmailJS

community app for managing repair requests, complaints, and announcements with automated email notifications.

Quick Bid - Digitalized Auction System | Spring Boot, MySQL Workbench

web-based auction platform handling real-time bidding, item listings, and user management via a structured relational database

Wear Me - Virtual TryOn | Python, Computer Vision, Pandas, Scikit-Learn

machine learning system that predicts and recommends men's outfits using computer vision and pose estimation, trained on curated data to deliver accurate clothing suggestions in real time

Safe Ride - IoT Powered Mobile App | Flutter, ESPdev, Firebase Realtime

A smart helmet companion app that integrates IoT sensors with a Flutter mobile interface, using Firebase Realtime Database to monitor rider safety data and trigger alerts on the go

Hkzmart - hkzmart.live | Firebase, JavaScript

An elegant e-commerce storefront for handmade gifts and accessories, featuring a responsive UI, Firebase-backed product management, and a smooth shopping experience optimised for performance
